CE 0302

RD635 – Patient X-Ray Apron for Panorama Shots

The RD635 protective apron for patients offers optimum radiation protection for standing X-ray exposures on panoramic or teleradiographic units.

The protective clothing is particularly convenient to put on because it can be individually adjusted to the girth of the respective patient with a flick of the wrist. The front-mounted fastening system prevents parts of the protective clothing from entering the image-relevant area due to it being closed inaccurately. The back lies smooth and flat against the body.

- **Protective Material** Novalite Plus or Leadfree 2.0
- **Lead Equivalent** 0.50 mm Pb (Front and Back)
- **Size**

Adult	Front: 80.0 x 60.0 cm (H x W)
